

5 Minute Field Trips Outcomes

Kindergarten Science

Outcome: LTK.1 Living Things in Our Environment

Examine observable characteristics of plants, animals, and people in their local environment. [CP, SI]

Outcome: NSK.1 Exploring Our Natural Surroundings

Explore features of their natural surroundings (e.g., soil, water, landform, and weather conditions), including changes to those surroundings over time. [DM, SI]

Kindergarten Social

Outcome: RWK.2 Resources and Wealth

Develop and demonstrate stewardship of the environment in daily actions, in an effort to promote balance and harmony.

Grade 1 Science

Outcome: LT1.1 Needs and Characteristics of Living Things

Differentiate between living things according to observable characteristics, including appearance and behaviour. [CP, SI]

Outcome: LT1.2 Needs and Characteristics of Living Things

Analyze different ways in which plants, animals, and humans interact with various natural and constructed environments to meet their basic needs. [CP, DM, SI]

Outcome: DS1.1 Earth and Space Science: Daily and Seasonal Changes

Compare and represent daily and seasonal changes of natural phenomena through observing, measuring, sequencing, and recording. [CP, SI]

Outcome: DS1.2 : Earth and Space Science: Daily and Seasonal Changes

Inquire into the ways in which plants, animals, and humans adapt to daily and seasonal changes by changing their appearance, behaviour, and/or location. [CP, DM, SI]

Grade 1 Social

Outcome: DR1.3 Dynamic Relationships

Demonstrate awareness of humans' reliance on the natural environment to meet needs, and how location affects families in meeting needs and wants.

Grade 2 Science

Outcome: AN2.1 Animal Growth and Changes

Analyze the growth and development of familiar animals, including birds, fish, insects, reptiles, amphibians, and mammals, during their life cycles. [CP, SI]

Outcome: AN2.2 Animal Growth and Changes

Compare the growth and development of humans with that of familiar animals. [CP, SI]

Outcome: AN2.3 Animal Growth and Changes

Assess the interdependence of humans and animals in natural and constructed environments. [CP, DM]

Outcome: AW2.2 Air and Water in the Environment

Assess the importance of air and water for the health and survival of living things, including self, and the environment. [CP, DM]

Grade 2 Social

Outcome: RW2.3 Resources and Wealth

Contribute to initiating and guiding change in local and global communities regarding environmental, social, and economic sustainability.

Grade 3 Science

Outcome: PL3.1 Plant Growth and Changes

Investigate the growth and development of plants, including the conditions necessary for germination.

Outcome: PL3.2 Plant Growth and Changes

Analyze the interdependence among plants, individuals, society, and the environment. [CP, DM, SI]

Grade 4 Science

Outcome: HC4.1 Habitats and Communities

Investigate the interdependence of plants and animals, including humans, within habitats and communities. [CP, SI]

Outcome: HC4.2 Habitats and Communities

Analyze the structures and behaviours of plants and animals that enable them to exist in various habitats. [SI]

Outcome: HC4.3 Habitats and Communities

Assess the effects of natural and human activities on habitats and communities, and propose actions to maintain or restore habitats. [CP, DM]
